## PROFILE

Second-year CS student who builds real things from day one. Started uploading projects to GitHub in first semester because practical work matters more than grades. Shipped a live AI learning platform, built Android apps, and picked up full-stack skills mostly by doing.

## PROJECTS

### StudyMate AI Python · Streamlit · Claude API · Groq

- Fully deployed AI learning platform with 8 tools in one place
- Explain, Summarize, Quiz, Flashcards, Study Plan, Pomodoro, AI Chat — all working
- Built as 2nd-year student and made live for real users

### Neon Hand Web Python · OpenCV · MediaPipe

- Real-time hand landmark visualizer using webcam
- Detects and draws hand joints with glowing neon effects live

### StoryForge AI JavaScript · HTML · Web Audio API

- Offline bilingual (Urdu/English) story generator
- Genre selection with Canvas API cover generation

### Android Fuel Estimator Java · Android Studio · XML

- Android app calculating fuel cost based on distance and fuel price
- Multi-screen navigation with user management module

### Personal Finance Tracker Python · HTML

- Tracks daily income and expenses with monthly budget monitoring

## EDUCATION

### Sindh Agriculture University, Tando Jam — BS Computer Science

2023 – Present
